

“They can't show you the law, because there isn't one!”

- They take your money before you even receive it from your employer.
- They seize your money in the form of FICA, and half of it hidden and doubled by your employer could instead have gone to your salary.
- They take over 8% of your money every time you buy anything, except gasoline. With gasoline purchases they take over 10% of what earnings they allowed you to keep.
- They annually take taxes from your property or your landlord, who passes it on to you.
- They annually impose ever increasing regulatory rules on the manufacturers of everything you buy further increasing the prices you pay with what dollars they allowed you to keep.
- They repeatedly tax the materials created, purchased, transported and assembled (business taxes) into the goods you purchase. Those taxes are passed onto you so those items you buy cost even more of the earnings they allowed you to keep.
- They annually inflate your dollars by 3% (some would correctly say 12%) so that you can now see the prices in your groceries, gasoline and utility bills rising a bit more every month.
- They take up to 28% of your risked investment earnings and tax the interest on your savings.
- They happily threaten all earners like you with ruin and prison every April 15th.

And what do you get for this extortion? This theft? This armed robbery? You get an ever bloating government devoted to securing ever higher amounts of your money, perpetuating the enforcement mechanisms to ensure its collection, and dispersing your earnings to themselves and those favored individuals and corporations that contribute money and gifts to your elected officials.

You get the promise of never ending wars to justify the military industrial complex. You get empty promises of health care (Medicare), Social Security, welfare, public education. You get ever repressive “public safety.” You get to see fat cats and special interests funded with your stolen tax dollars. You get to see the terror mechanisms of the state increase daily in intrusiveness, size and scope to ensure your earnings flow unimpeded into their coffers and to secure your unwaivering obedience. You get to watch all the wealth of the middle class drained out and shipped over seas. You get to watch the price of groceries increase weekly as the value of your dollar is manipulated and diminished with taxpayer funded fat cat bailouts.

The government looks at your earnings as if they own them. It is really theirs. After all they had the money printed for them, and should get to decide how much you get to keep. Right?

“When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with one another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature’s God entitles them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.”

— Declaration of Independence

THE REVOLUTION CONTINUES

Aaron Russo, the producer of the hit movies, “**Trading Places**” and “**The Rose**,” set out to do to the **Internal Revenue Service** (IRS) what **Michael Moore** did to **George Bush**. Expose them by filming a documentary. You may have been fortunate enough to receive a copy of the theatrical release tonight complements of Aaron. Watch him make the IRS squirm. Tonight is the perfect night to cap off your anger with excessive taxation. Easily over half of what you earn goes to government.

Along the way to making his movie on the IRS, Mr. Russo ran across a corporation even more insidious in stealing your earnings than our own government—The Federal Reserve. The Federal Reserve, a private business, prints your U.S. dollars (that is “Federal Reserve Notes;” pull any dollar out and look on the back). It sells them to your U.S. Treasury Department at a nice profit (2% to 3% on the dollar) who then circulates them to the banks.

Realize there is nothing behind these Federal Reserve Notes you call dollars. **There is no gold**. There is only paper with numbers printed upon them. They are redeemed at the “full faith and credit of the United States government.” Which means as long as people perceive these dollars as having value they do. The moment people lose that perception these notes become what they are in reality: Pieces of paper with numbers printed upon them.

America: From Freedom to Fascism by Aaron Russo

You can also watch the **entire movie** on the Internet for free at this web site (Google Video): <http://tinyurl.com/22sfw3>

So they steal your earnings directly through taxation, and they steal them by inflating the value of whatever you save by indirectly inflating the dollar. Your tax money at work. And man are you getting your money's worth. Wake up America! It is too late to save the Republic. But it is not too late to save yourselves.

“Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King ... is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.” — Declaration of Independence
